

Hope Township Municipal Water System

Project Status January 14, 2014

- The project is nearing completion. The booster station is now online and we are nearing the end of service lead installation. There are approximately 65 service leads to be installed as of January 13, 2014.
- Now that the booster station is operational, water district will be taking over the northern part of the water system allowing residents in that area to hook up their service leads. As a reminder, you will receive a letter from the Township informing you when you can obtain a permit to have your lead installed from the curb box to your home.
- Final clean up and restoration will be on going and completed in the summer.
