## Hope Township Municipal Water System

**Project Status**  
**June 12, 2012**

### Municipal Water Project:

- Base plans are complete, and include existing utility information, property lines, parcel numbers, and existing physical features.
- We have the preliminary design of the water main completed for the entire water district including hydrant and valve locations. We continue to work on the plans and specifications to get them prepared for review and permit submittals.
- Specifications and Contract Documents are approximately 85% complete.
- Soil Boring crews will be out in the next few weeks to collect information on the underground conditions throughout the project limits.
- It should be noted that this summary indicates our progress for the design phase of the project. Our invoices indicate the percent complete of our budget and scope of the Design and Construction Administration portion of the project. This budget is based on a specific section of our scope of services that will continue on throughout construction.
